Amendment to the Specifications

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the closed prior art of record (Milillo, U.S. Patent No. 6,643,671) does not teach nor suggest in detail "a method for transferring data in a PPRC environment, comprising: pre-allocating at least a first payload buffer in a secondary storage control unit; pre-allocating at least a first data buffer in the secondary storage control unit; issuing a first write command for the transfer of a first block of data from a primary storage control unit to the secondary storage control unit; packaging write control information with a fibre channel protocol (FCP) command within a first extended command descriptor block

(CDB); transmitting the first extended CDB from the primary storage control unit to the secondary storage control unit; and transmitting the first block of data from the primary storage control unit to the secondary storage control unit", in combination with all the elements of each independent claim as presented by Applicant. The Claims are allowable in light of the updated search, and enabling portion of the specifications.

The dependent claims further limit the independent claims and are considered allowable on the same basis as the independent claims as well as for the further limitations set forth.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Allowed Claims
